SECONDARY FIELD IN ENERGY & ENVIRONMENT

Environmental Science & Public Policy Program

Are You Ready for the Energy-Environment Challenge?

The Environmental Science and Public Policy program, in coordination with the Harvard University Center for the Environment, is pleased to offer the Secondary Field in Energy and Environment (E&E). Students will increase their exposure to, and literacy in, the interconnected, interdisciplinary issues related to energy and the environment while maintaining their focus in their home concentrations. Through debate and dialogue in coursework and seminars, students will identify the obstacles, highlight the opportunities, and define the discussion for an energy-environment strategy for the 21st century and beyond.

REQUIREMENTS (4 HALF COURSES)

Students choose one foundational E&E course, featuring content related to both energy and environment, and three additional upper-level courses divided between the Social Sciences/Humanities and the Natural Sciences/Engineering.

Visit our website for a complete course list.

Students must declare their intent for the program no later than study card day of the second semester of their junior year. The deadline for students currently in their junior year is **January 29th, 2016**.
