

HARVARD GRADUATE CONSORTIUM on ENERGY & ENVIRONMENT

Training a new generation of scholars to identify the obstacles, highlight the opportunities, and define the discussion of an energy strategy for the 21st century and beyond.

ELIGIBILITY REQUIREMENTS

The Consortium is open to Ph.D. and Sc.D. students at Harvard who have completed at least one year in their home department or school, and can demonstrate that participation in the Consortium will advance the goals of their research. Once admitted, students are required to participate in a weekly reading seminar that provides an overview of the energy field, and to complete three courses:

- **Energy Consequences (Fall)** – Taught by Daniel Schrag, Department of Earth and Planetary Sciences, and staff
- **Energy Technology (Spring)** – Taught by Michael Aziz, School of Engineering and Applied Sciences. *Note:* This course is offered for either a letter grade or as pass/fail to accommodate different academic backgrounds.
- **Energy Policy (Spring)** – Taught by Joseph Aldy, Harvard Kennedy School

APPLICATION INFORMATION

Visit www.energy.harvard.edu to complete the online application form. The form and all supplementary materials are due by **MONDAY, MAY 20, 2013.**
