

# HQI

# UNDERGRADUATE SUMMER RESEARCH FELLOWSHIP 2024

## APPLICATIONS NOW OPEN IN CARAT

The **Harvard Quantum Initiative (HQI)** is inviting applications for **undergraduate summer research** fellows. This competitive program will select around 10 undergraduate researchers performing research in **quantum science and engineering**, encompassing theory, materials, devices, and systems research. HQI will provide supplemental financial support and a supportive community for exceptional undergraduates conducting research in this field on campus. This program is tailored for students with prior research experience. Students from various disciplines associated with HQI are encouraged to apply, including physics, chemistry, applied/theoretical mathematics, computer science, and electrical engineering. Note that this is not a stand-alone program – *students must also apply to summer HCRP, PRISE, or secure an alternative primary funding source.*

## DEADLINE: MARCH 25TH, 2024
